

Charity Fundraising

How this will help your child

- This activity will allow your child to practise making, reading and saying numbers in the millions.
- It will help them to understand how the value of a digit is shown by its position in a number.
- It will also help them to compare and order big numbers.

Words and phrases to use

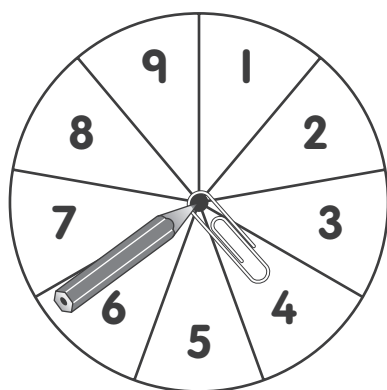

number names (one to nine million), place value, worth, greater, smaller, digit, ones, tens, hundreds, ten thousands, hundred thousands, millions, zero

You will need

- A paper clip
- 2 pencils

During the activity, look at what your child can do

- Make 7-digit numbers using their understanding of place value.
- Say the correct number name to the correct place value.

Six million, four hundred and ten thousand, four hundred and sixty-four pounds

		Millions	Hundred thousands	Ten thousands	Thousands	Hundreds	Tens	Ones
Tiger charity	£	6	4	1	0	4	6	4

2

What to do

- Ask your child to choose a charity from the table on the Charity Fundraising sheet, e.g. Tiger Charity.
- Use the paper clip and a pencil to make the spinner. **1**
- Ask your child to spin the paper clip to choose a digit and then to pick a column in the table to write the digit in, e.g. the hundreds column. Write in pencil so the game can be played again.
- Take turns to spin the spinner five more times, with your child writing each digit in one of the columns for their chosen charity. There will be one column left. Ask your child to write a zero in this column. Explain that the number they have made with the digits is the amount of money the charity raised in a year.
- Ask your child to read the amount raised, e.g. 'Tiger Charity has raised six million, four hundred and ten thousand, four hundred and sixty-four pounds'. **2**
- Repeat for each charity until the table has been completed and your child has read all the amounts.
- Now ask them to order the amounts by writing the names of the charities, from the lowest to the highest amount raised, in the chart on the bottom of the sheet, e.g. **3**.

Next steps ...

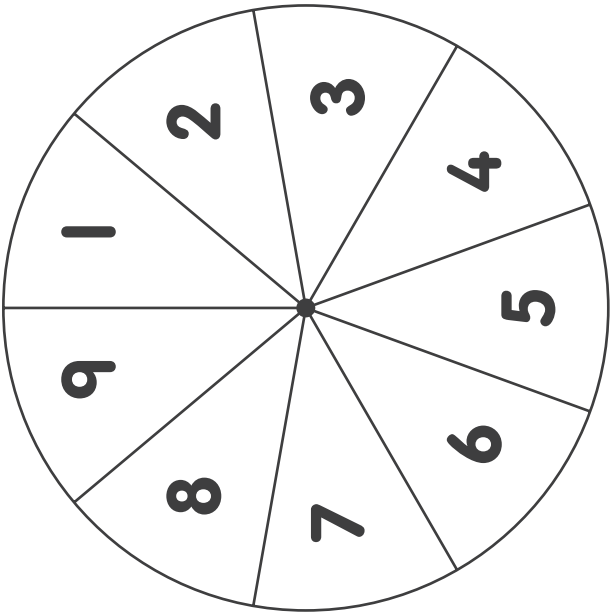

- Rub out the markings and play the game again. Aim to get the highest amount of money for each charity by thinking about which columns to place the numbers in.
- Play the game again, spinning five numbers and writing two zeroes.
- Look for 7-digit numbers with your child, e.g. in newspapers or when out and about. Ask them to read the numbers and talk about what they mean.

Lowest amount	Tiger Charity	Eagle Charity	Donkey Charity	Polar Bear Charity	Panda Charity	Cat Charity	Highest amount
