Tips For Using Westminster Children's University Website

Our aim is to offer virtual ,extracurricular activity so that educators can engage in our offer through our website with their students; easing the burden on educators to produce online packages of content and allowing participants to generate hours online and at home until such time we can resume our normal activity.

1

You don't need a login for our site

If you are a parent or child logging in to take part on our Westminster Children's University site, you won't need a login or your student number.

The student login is for the Children's University national site where you can check and add to your claimed numbers.

2

Everyone is welcome, come on in!

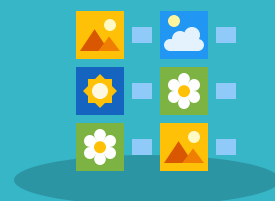

You can find us at

<https://www.westminsterchildrensuniversity.co.uk>

There is a wealth of information and activity to access and take part in . All of it is completely free of charge and without the need to register, login in or commit.

3

Investigate

There is a full range of information available from us online .You will see in our tabs there is access to: news, dates, updates about us, partner school profiles, partner details and in the **for Parents and Children Tab** everything you will need to take part in a wide range of online projects.

4

Online videos

We respect your privacy and do not share photos or videos of activities online without prior agreement. Any content added must first go through parents ,then to coordinators and must be signed off. first. However we do share and produce video content so there's plenty to see and do.

5

Try something new

We have fully Interactive Timetables, Partners' Projects ,Wellbeing Challenges ,Wildlife Spotting Guides ,Arts Award ,Youth Council and adult training possibilities to name but few. Log into our Kidzone to access curriculum challenges and games

6

Share and record

Use our online learning logs to record what you have done online or record directly in your passports..The school coordinators regularly check,accredit and report these back to us at Westminster Children's University. If you have work to share take it to the On-site coordinator we love to see and share it online.

We have worked tirelessly over the last few months to engage virtual projects created for primary and secondary school educators and can currently offer: virtual work experience, content streamed into classrooms, well-being support and support for staff in teams and Adobe training and licences.

All of our online resources are available on the Westminster Children's University Website by selecting the For Children and Parents tab (orange, star balloon) or directly from me at Queens Park Primary School, W10 4DQ. For our training, wellbeing and mental health consultation and one-way, GDPR compliant, in-class streaming please contact me directly to arrange a meeting and to book.
