

Why Choose Us?

Westminster Children's University

Westminster Children's University is an aspirational and extracurricular project created in response to the desire to provide free inspiring and educational opportunities for the young people of London.

The Westminster Children's University project seeks to engage young people in activities that will help them transition from primary to secondary school and then maintain the positive trend in transition to further education while promoting wellbeing and empowerment through activities and training.

Cost

We achieve improved access to opportunities by negating the need for financial stability to access cultural educational and developmental opportunities. Coordinating and providing available provision for young people and their local community.

Our Offer

We liaise with partners and schools to organise and provide outreach and promote cooperate sustainability. We: facilitate train, trips, curriculum planning and clubs dependant solely on the needs and wishes of partner organisations.

Our Mission

We seek to offer opportunities for young Londoners to experience the world of wider work and culture, in order that they may engage and connect with professions, disciplines and creative arts in ways that they may not otherwise have the opportunity to do.

Responding to challenge

We have recruited extra staff to continue to grow and maintain projects in a sustainable manner and have continued to provide content during lockdown ;coordinating: Virtual Science parties, Webinars and hours of code with Finastra and the seeding of two community off-site projects.

We seek to ease the burden upon schools to organise, fund and coordinate extracurricular activity.

Our Goals

Our goal is to provide free, partnership and outreach opportunities for the Young people of London. Graduating again this coming July ,in Kensington Town Hall, having facilitated over 81000 hours of extracurricular educational activity across partner schools .

Our goal is to provide free, partnership and outreach opportunities for the Young people of London.

Wider offer

We continue to develop, create and share online experiences and learning. Offering PHSE/RSE/MHFA consultancy and training as part of our wider offer.
